PATIENT CONSENT AND ACKNOWLEDMENT

I have reviewed the above Pre-Colonoscopy Patient Questionnaire, and I have answered all the questions to the best of my knowledge. I understand that incomplete or false information may result in unexpected complications related to the colonoscopy procedure itself or to the conscious sedation. These complications, which may happen even with your excellent health, may include abdominal pain and bloating, bleeding, bowel perforation, and reaction to medications.

I also understand and accept the fact that my colonoscopy may not be completed due to inadequate preparation of the colon, my reactions to the medications used for conscious sedation, or excessive risk for complications as decided by the performing physician before or during the procedure. In such a case, I may choose to have another colonoscopy at different times, or to have barium enema – a radiological procedure (X-ray) during which a liquid contrast material is used to evaluate colon for presence of polyps and cancers. However, barium enema is generally less sensitive to detection of small polyps and masses than colonoscopy, may be uncomfortable, and does not allow removal of detected lesions.

Finally, I may choose not to have any follow-up screening procedure, and I understand the possible risks of such a decision.
